Collective Brain skills catalogue

All 95 skills listed on collectivebrain.de/en/skills (Collective Brain, Hamburg), extracted on 13 November 2026, with what each does and where it stands in this repository. The same data is in `collectivebrain_skills.csv` (with install commands and page links).

Status	Skills	Meaning
Added	22	Copied into `.claude/skills/` from the author's open-source repository (MIT or Apache 2.0), reviewed first
In repo	2	Already here from earlier (Superpowers, Caveman)
Built in	11	Part of Claude already (PDF, Word, Excel, PowerPoint, Skill Creator, Cowork, ...)
Install yourself	56	Hosted by Collective Brain, free to use but with no license to republish, so not stored here. Install with `scripts/install_collectivebrain_skills.sh`
Not added	4	Left out for the reason given

Design & UX (17)

Skill	What it does	Author	Status
Design Critique	Structured design critique: usability, hierarchy, consistency, accessibility. Honest, but not cynical, like a good senior colleague.	Anthropic	Install yourself: `design-design-critique`
Accessibility Review (WCAG 2.1 AA)	Full WCAG 2.1 AA audit: contrast, keyboard navigation, touch targets, screen readers. Before every launch.	Anthropic	Install yourself: `design-accessibility-review`
UX Copy	Microcopy, error messages, empty states, CTAs, written without sounding like marketing.	Anthropic	Install yourself: `design-ux-copy`
User Research Synthesis	Turns 15 interview transcripts into 3 main themes, 5 hypotheses, and a backlog. Instead of 4 hours with sticky notes on a wall.	Anthropic	Install yourself: `design-research-synthesis`
Design Handoff Spec	From mockup to dev spec with tokens, component props, interaction states, and edge cases, reliably ready to hand off.	Anthropic	Install yourself: `design-design-handoff`
Design System Audit & Extend	Finds hardcoded values, inconsistent naming patterns, and drift in your design system. Plus: proposes new patterns that fit the architecture.	Anthropic	Install yourself: `design-design-system`
User Research Planning	From research goal to interview guide. Questions that aren't manipulative and answers that are worth something.	Anthropic	Install yourself: `design-user-research`
Anthropic Frontend Design	Produces distinctive, production-ready UI layouts instead of generic templates.	Anthropic	Install yourself: `anthropic-frontend-design`
Vercel Web Design Guidelines	Audits web UIs against more than 100 heuristics covering UX, layout and accessibility.	Vercel Labs	Install yourself: `vercel-web-design-guidelines`

Skill	What it does	Author	Status
Figma to Code	Translates Figma frames into clean HTML/CSS or React code with a clear structure.	Collective Brain	Install yourself: `figma-to-code`
Theme Factory	Apply one of 10 curated slide-deck themes (colors, fonts, layout tokens) or generate a custom theme from your brand colors. Palettes and font pairings included inline.	Anthropic	Install yourself: `theme-factory`
UX Flow & Wireframer	Sketches user flows and low-fidelity wireframes as text layouts and diagrams.	Community	Install yourself: `ux-flow-wireframer`
Impeccable	Impeccable gives Claude Code and other coding agents a design vocabulary: 24 commands to plan, evaluate and refine interfaces, plus a local detector with 62 rules.	Paul Bakaus	Added: `impeccable`
Emil Design Eng	The skill helps you build interfaces and animations following Emil Kowalski's design engineering principles and review UI code in a focused way.	emilkowalski	Added: `emil-design-eng`
Review Animations	Review Animations checks your animation and motion code against a strict rule set and returns a findings table with a clear Block or Approve decision.	emilkowalski	Added: `review-animations`
shadcn	You let Claude add, search, style and fix shadcn/ui components while it follows fixed rules for styling, forms and component structure.	shadcn	Added: `shadcn`
Apple Design	Apple Design helps you build and review gesture-driven web interfaces and spring animations based on Apple's motion principles.	emilkowalski	Added: `apple-design`

Branding (6)

Skill	What it does	Author	Status
Brand Voice Enforcement	Automatically applies your brand guidelines to every email, pitch deck, and social post. No more five different voices across the team.	Anthropic	Install yourself: `brand-voice-enforcement`
Brand Voice Guidelines Generator	Turns sales call transcripts, Notion docs, or a handful of examples into a binding voice guide, in 30 minutes instead of 30 days.	Anthropic	Install yourself: `brand-voice-guideline-generation`
Discover Brand Materials	Autonomously searches Notion, Confluence, Google Drive, Figma, Gong, and Slack for everything that belongs to your brand, and delivers a sorted overview.	Anthropic	Install yourself: `brand-voice-discover-brand`
Brand Review	Before you hit send: does the text fit the brand? Catches brand drift, legal risks and clichés before they go out.	Anthropic	Install yourself: `marketing-brand-review`
Anthropic Brand Application	Applies Anthropic brand standards to any artifact: colors, typography, visual language. Especially handy when you are building something for or with Anthropic.	Anthropic	Built in

Skill	What it does	Author	Status
Brandkit	Builds complete brand boards with logo ideas, a color world, typography and mockups.	Community	Install yourself: `brandkit`

Product (7)

Skill	What it does	Author	Status
Vercel React Best Practices	Reviews React/Next.js code against performance, DX and UX best practices.	Vercel Labs	Install yourself: `vercel-react-best-practices`
Website Builder (Landing Page Component System)	Generates complete landing pages from a component library and deploys them as a WordPress draft.	Community	Install yourself: `website-builder`
UX Research Interview Kit	Creates guides, scripts, and evaluation frameworks for structured UX interviews.	Community	Install yourself: `ux-research-interview-kit`
Persona Workshop Facilitator	Helps derive and sharpen B2B personas from research and CRM data.	Community	Install yourself: `persona-workshop-facilitator`
B2B Value Proposition Mapper	Structures customer problems, solutions, and proof points into clear value propositions.	Community	Install yourself: `b2b-value-proposition-mapper`
Founder Pitch Deck Coach	Structures B2B pitch decks and improves the storyline, slides, and graphics.	Community	Install yourself: `founder-pitch-deck-coach`
GitHub Actions: Minuten sparen	Stop blocked deploys and burned CI budget. This skill diagnoses the Actions limit, sets up the right budget, and slims down your workflow (cancel-in-progress, paths-ignore, timeout, fast npm ci).	Collective Brain	Install yourself: `github-actions-sparen`

Visual (4)

Skill	What it does	Author	Status
Canvas Design	PNG and PDF designs grounded in design philosophy: posters, business cards, artwork. Always original, never copied.	Anthropic	Built in
DIVI WordPress Editing	Edit, optimize, and migrate DIVI sites: layouts, modules, templates, child themes, performance, and DIVI 5 migration.	Community	Install yourself: `anthropic-divi-edit`
imagegen-frontend-mobile	Delivers mobile app screens as mockups for convincing product previews.	Community	Install yourself: `imagegen-frontend-mobile`

Skill	What it does	Author	Status
Algorithmic Art	Create standalone generative art with p5.js, from algorithmic philosophy to an interactive viewer. Seeded randomness, flow fields, and particle systems produce reproducible, parametrically controllable works without copying anyone's templates.	Anthropic	Install yourself: `algorithmic-art`

AI & Automation (12)

Skill	What it does	Author	Status
Skill Creator	Creates, improves, and tests your own Claude skills. Includes an eval suite and description optimization for better triggering.	Anthropic	Built in
Create Cowork Plugin	Walks you through building your own Cowork plugin, from the first idea to the finished .plugin file.	Anthropic	Built in
Customize Cowork Plugin	Adapts an existing plugin to your organization's tools, wording, and workflows, without forking the plugin.	Anthropic	Built in
Schedule Tasks	Run recurring tasks automatically: a briefing every morning, a weekly plan every Monday, an inbox check every hour.	Anthropic	Built in
Setup Cowork	Guided onboarding: install role-matched plugins, connect your tools, and try a first skill.	Anthropic	Built in
Google Ads Performance Analyzer	Analyzes Google Ads data, builds pivot tables, and delivers optimization suggestions.	Community	Install yourself: `google-ads-analyzer`
VopixSounds	Makes Claude Code audible. One sound when Claude is waiting for your approval or input, a different one when a task is finished. Keep working in another window and never miss the moment Claude needs you.	Vopix	Install yourself: `vopixsounds`
Claude API Referenz	Build LLM applications directly against the Anthropic SDK instead of guessing from memory. Current model IDs, pricing, parameters, streaming, tool use, MCP, agents, caching, and token counting in one place.	Anthropic	Install yourself: `claude-api`
MCP Builder	Build high-quality MCP servers that connect LLMs to external APIs and services through well-designed tools. This skill guides you through research, design, and implementation in Python (FastMCP) or Node/TypeScript (MCP SDK).	Anthropic	Install yourself: `mcp-builder`
Task Observer	Watches your Claude sessions and proposes better and new skills from your corrections and patterns.	Eoghan Henn	Not added: Runs during any multi-step task and writes logs to the workspace (CC BY 4.0)
Find Skills	You ask about a task, and Claude uses the Skills CLI to search for matching skills, checks install counts and origin, and installs them if you want.	vercel-labs	Not added: Triggers on any 'how do I...' question and installs unvetted third-party skills with npx

Skill	What it does	Author	Status
Azure AI	You build applications on Azure AI Search, Speech, Azure OpenAI or Document Intelligence and let Claude help with setup, queries and troubleshooting.	microsoft	Added: `azure-ai`

Development & Code (16)

Skill	What it does	Author	Status
Security Audit	You have Claude check codebases, APIs and services for security flaws and get source evidence, a priority and the smallest effective fix for each finding.	cloudflare	Added: `security-audit`
Superpowers	Superpowers gives Claude fixed workflows for software projects, from clarifying your requirements through planning and test-driven development to debugging and code review.	obra	In repo
Google Agents CLI ADK Code	You get a quick reference for Google's Agent Development Kit with code examples in Python and Go. Claude uses it to write agents, tools, callbacks and workflows that follow ADK patterns.	google	Added: `google-agents-cli-adk-code`
Agent Browser	With Agent Browser you let Claude control a Chrome or Chromium browser from the command line to open pages, fill in forms, extract data and test web apps.	vercel-labs	Not added: Tells Claude to prefer it over built-in web tools, but needs a CLI that is not installed
TDD	You write the failing test before the code: the skill gives Claude rules for the red-green loop, for good tests and for mocking at system boundaries.	mattpocock	Added: `tdd`
Setup Matt Pocock Skills	You prepare your repository for Matt Pocock's engineering skills in a single run. The skill sets up the issue tracker, triage labels and the location of your glossary and ADRs.	mattpocock	Added: `setup-matt-pocock-skills`
Caveman	Caveman shortens the output of Claude Code and its subagents, writes terse commit messages and reviews and condenses memory files so your context lasts longer.	juliusbrussee	In repo
TypeScript Advanced Types	The skill gives Claude explanations and code examples for mapped types, generics, conditional types, utility types and template literal types, so you can implement complex type logic in TypeScript cleanly.	wshobson	Added: `typescript-advanced-types`
Herdr	With Herdr, you let Claude control panes, tabs and workspaces in the Herdr terminal multiplexer, start other coding agents and check their status.	herdrdev	Added: `herdr`

Skill	What it does	Author	Status
Google Agents CLI Deploy	You deploy your AI agent with agents-cli to Agent Runtime, Cloud Run or GKE and set up CI/CD, secrets and service accounts along the way.	google	Added: `google-agents-cli-deploy`
playwright-cli	With playwright-cli you have Claude control a browser through commands, check web pages, simulate network responses and debug Playwright tests from the terminal.	microsoft	Added: `playwright-cli`
Ponytail	Ponytail makes Claude build the smallest complete change for coding tasks and checks your changes or your whole repository for bugs, risks and unneeded code.	dietrichgebert	Added: `ponytail`
Turborepo	You let Claude set up and debug configuration, caching and CI workflows in your Turborepo monorepo, based on the docs that belong to your turbo version.	vercel	Added: `turborepo`
Google Agents CLI Publish	You register an already deployed agent in your Gemini app with agents-cli and manage agents and MCP servers in Agent Registry.	google	Added: `google-agents-cli-publish`
Supabase Postgres Best Practices	It gives Claude Postgres rules you can rely on when writing SQL, designing schemas, running migrations, writing RLS policies or investigating slow queries.	supabase	Added: `supabase-postgres-best-practices`
Accessibility	You let Claude audit your website against WCAG 2.2 and fix the barriers it finds directly in the source code, followed by a fresh check.	addyosmani	Added: `accessibility`

Content & Marketing (25)

Skill	What it does	Author	Status
Campaign Plan	Turns a marketing goal into a 12-week plan with channels, content calendar and dependencies. No spreadsheet lasagna.	Anthropic	Install yourself: `marketing-campaign-plan`
Content Creation	Blog posts, social media, newsletters, landing pages, case studies. Channel-specific, SEO-aware, without the LinkedIn madness.	Anthropic	Install yourself: `marketing-content-creation`
Email Sequence	Drip sequences with timing, branching, exit conditions, and A/B test suggestions.	Anthropic	Install yourself: `marketing-email-sequence`
SEO Audit	Keyword gaps, on-page issues, content gaps and a competitor comparison, delivered as a prioritized action list, not an 80-page PDF.	Anthropic	Install yourself: `marketing-seo-audit`

Skill	What it does	Author	Status
SEO / GEO / AEO Website Audit	Audits any website across three visibility layers: SEO (Google, Bing), GEO (Perplexity, ChatGPT Search, Gemini, Google AI Overviews) and AEO (featured snippets, voice). Delivers scores plus a prioritized action list as Word and PDF.	SNLabat	Not added: No license in its repository (all rights reserved)
Competitive Brief	Five competitors, compared side by side on messaging, visuals, pricing signals and open market niches.	Anthropic	Install yourself: `marketing-competitive-brief`
Performance Report	Translates marketing data into an executive story, with wins, misses and recommendations for the next period.	Anthropic	Install yourself: `marketing-performance-report`
AI Marketing Team	Simulates a small marketing team with roles such as strategist, copywriter and analyst.	Community	Install yourself: `ai-marketing-team`
Keyword Strategy Planner	Turns a keyword CSV into a prioritized content and SEO strategy with intent mapping.	Community	Install yourself: `keyword-strategy-planner`
UX Copy Refiner	Optimizes microcopy for forms, modals, CTAs, and error messages to improve clarity.	Community	Install yourself: `ux-copy-refiner`
Sales Enablement Pack	Creates one-pagers, battlecards, and objection handling based on product information.	Community	Install yourself: `sales-enablement-pack`
Doc Co-Authoring Workflow	Walks you through a structured workflow for writing documentation together with Claude. You gather context, build each section iteratively, and test at the end whether the text works for real readers.	Anthropic	Install yourself: `doc-coauthoring`
Interne Kommunikation	Write internal communications in the formats your company likes. From status reports and leadership updates to newsletters, FAQs, and incident reports, this skill delivers the right templates and the right tone.	Anthropic	Install yourself: `internal-comms`
SEO Strategy: 90-Day Roadmap	Turns your current SEO situation into a 90-day roadmap with ICE scores, three priorities and a not-doing list for everything that waits until next quarter.	Collective Brain	Install yourself: `seo-strategie-roadmap`
Keyword Research with Topic Clusters	Finds keywords your site can win with the authority it has today, labels them by search intent and groups them into 4 to 6 topic clusters with a pillar article.	Collective Brain	Install yourself: `keyword-recherche-cluster`
Search Console Analysis: Find Quick Wins	Reads your GSC export and pulls out striking-distance pages, click losses, CTR outliers and cannibalisation, each with a URL and a fix for this week.	Collective Brain	Install yourself: `search-console-analyse`
SEO Competitive Analysis	Take apart the pages already ranking for your topic and get a content gap map, a keyword steal list and the three pages to write first.	Collective Brain	Install yourself: `seo-wettbewerbsanalyse`
Write SEO Articles	Get a finished SEO article with title tag, meta description, FAQ and internal links, built from the live SERP and written without AI stock phrases.	Collective Brain	Install yourself: `seo-artikel-schreiben`

Skill	What it does	Author	Status
On-Page Optimisation for Existing Pages	Hand over an existing URL and a target keyword, get finished rewrites for title, meta, headings and intro, plus content gaps and a schema recommendation.	Collective Brain	Install yourself: `onpage-optimierung`
Plan Internal Linking	Finds orphan pages, unused authority pages and broken topic clusters. You get a link plan with exact anchor text and placement in every row, not a pile of advice.	Collective Brain	Install yourself: `interne-verlinkung`
Set Up a Backlink Campaign	Plans a clean link campaign across five prospect categories and ships the outreach mails with it. No PBNs, no paid links, no tactics that risk a manual action.	Collective Brain	Install yourself: `backlink-kampagne`
Indexing Audit	Sorts your URLs into keep, deindex, consolidate and missing. Every finding comes with the ready directive: noindex, robots.txt rule, canonical or 301.	Collective Brain	Install yourself: `indexierungs-audit`
Generate Schema Markup	You get valid JSON-LD for a specific page, matched against its visible content, plus a list of every placeholder and the warnings the Rich Results Test will raise.	Collective Brain	Install yourself: `schema-markup-generator`
Optimize Your Brand SERP	You see what Google serves for your brand name, how much of it you control, and which five measures improve the brand SERP fastest.	Collective Brain	Install yourself: `brand-serp-optimierung`
Local SEO Audit	You check Google Business Profile, NAP consistency, reviews and location pages in one pass and get the five fixes with the best impact-to-effort ratio.	Collective Brain	Install yourself: `local-seo-audit`

Office & Data (8)

Skill	What it does	Author	Status
PDF Workflows	Create, read, merge, split, OCR and fill out forms in PDFs, without an Adobe subscription.	Anthropic	Built in
Word Document Creation	Word documents with a table of contents, headers, page numbers and a letterhead, generated programmatically.	Anthropic	Built in
Excel Spreadsheets	Read and write Excel files, with formulas and charts. Even for the spreadsheets nobody wants to clean up anymore.	Anthropic	Built in
PowerPoint Presentations	Slide decks from an outline, data, or a story. With layouts, speaker notes, and on-brand charts, ready for the pitch.	Anthropic	Built in
Notion Ops Connector	Reads and updates Notion databases for content plans, roadmaps, and wikis.	Community	Install yourself: `notion-ops-connector`
Obsidian Markdown	You let Claude create and edit notes for Obsidian, using wikilinks, embeds, callouts, tags and frontmatter properties in valid syntax.	kepano	Added: `obsidian-markdown`

Skill	What it does	Author	Status
Obsidian Bases	You let Claude create and edit Bases in Obsidian: filters, computed formulas, summaries and views as a table, cards, list or map.	kepano	Added: `obsidian-bases`
lark-im	With lark-im you send and reply to Lark messages through Claude, search chat history, manage group chats and download files from conversations.	larksuite	Added: `lark-im`

Notes

- **Licenses**: the 22 added skills keep their license files; their repositories and commits are listed in `SKILLS.md`. Collective Brain's own pages give no license for the files it hosts, and a few of those are condensed versions of Anthropic skills.
- **Checked before listing**: all 56 hosted files were downloaded and scanned; none contains shell pipes to remote scripts, destructive commands, credential access or instructions to override the user.
- **Token cost**: Claude reads every installed skill's description at the start of each session (roughly 30-150 tokens each), so install the hosted ones you will actually use rather than all 56.
